## LIVERPOOL HEALTH AND ACADEMIC PRECINCT

South Western Sydney  
Local Health District  
Health Infrastructure

It is an exciting time for the local community with the NSW Government investing \$740 million for the redevelopment of Liverpool Hospital.

An additional \$50 million has been committed for a new multi-storey car park which will replace the smaller existing multi-storey car park on the site, providing 500 additional spaces across campus.

As one of the state's biggest infrastructure projects, the precinct will boost the local economy and showcase Liverpool Hospital to the world as a hub for innovation and medical research.

### How will Liverpool benefit from the redevelopment?

The redevelopment will provide enhanced healthcare and services for the community, close to home. This increased capacity will be complemented by expanded clinical services, public spaces and car parking, and integrated with research and teaching facilities to help ensure that Liverpool Hospital meets the needs of the growing community.

The employment opportunities generated through the redevelopment will boost the local economy, both during construction and on completion, and our staff will have the opportunity to work in a modern facility that supports their ongoing development.

### What will the new Liverpool Health and Academic Precinct include?

- Larger emergency department, intensive care unit and more theatres
- Expanded neonatal intensive care unit and children's services
- Enhanced maternity and women's health services
- Integrated cancer services

- Increased ambulatory care services and outpatient clinics
- New multi-storey car park with improved pick-up and drop-off points.

### Will patient care be impacted during construction?

Patients will experience no reduction in the high quality of care provided by Liverpool Hospital. Disruptions will be minimised and those affected will be informed of any planned changes.

### Will there be enough parking for the precinct?

There will be additional parking as part of the redevelopment, with dedicated parking areas for staff and visitors, more drop off and pick-up points, and improved flow of vehicles through the precinct.

### When will the redevelopment be completed?

The main works are programmed across two stages, consisting of both new build and refurbished space. Stage 1 main works is scheduled for completion in 2023, with stage 2 due for completion in late 2026.
