HEALTH AND ACADEMIC PRECINCT

**NEWSLETTER | JULY 2021** 

#### Comfort for bereaved families

As part of the redevelopment, a new mortuary has been created, boasting a range of enhancements.

The new space includes a viewing room which aims to support bereaved families through the provision of a comfortable environment that is sensitive to the needs of different cultures.

Along with a new viewing room, there is also new and advanced technology including security upgrades, as well as a dedicated waiting area and internal public bathrooms.

The new space has been designed to respond to current needs and accommodate increased capacity.

Mortuary Coordinator, Jerry Spanidis, said the new mortuary design had helped address the needs of both staff and the community.

"It meets our commitment to preserve the dignity and wishes of the deceased and family members. with a well-designed viewing room offering privacy and support to bereaving families and relatives."

Additionally, the new viewing room and waiting area feature vinyl wall art and neutral furnishings, creating a welcoming and calming space for family groups and other visitors to the facility.

## HEALTH AND ACADEMIC PRECINCT

**NEWSLETTER | JULY 2021** 

#### Student learning opportunity

We recently invited students from Liverpool Girls High School and Liverpool Boys High School to visit the multi-storey car park construction site and witness the final ground floor slab being poured.

Stefan from ADCO Constructions, our project builders, gave the students a great insight into the concrete slab construction process, including how concrete is prepared, tested and poured.

## View from the top!

Fun fact – it takes 170 steep steps and around six minutes for our tower crane operator to reach their office each morning.

The operator can make the trip up to eight times a day. totaling 2270 steps - that's a lot of climbing.

Check out the great views of Liverpool and the multi-storey car park construction site from the cabin!

#### Car park project in the spotlight

Be sure to check out the latest video for an update on the new multi-storey car park construction, as it begins to rise over the hospital. It also highlights recent project milestones and what's planned for coming months.

> View it on YouTube at https://youtu.be/cmw8x\_fJ0Nc

Throughout the year we'll be keeping you updated on progress of the redevelopment project with a series of videos. Be sure to keep an eye out for the next edition in August!

#### 60 seconds with...

Name: Trevor

Role: ICT Project Manager, LHAP

Trevor has more than 20 years of experience in Information Communications Technology, Telecommunications and Biomedical Science.

His days as part of redevelopment team involve managing redevelopment related changes to the hospital's ICT network infrastructure - one of the most crucial components of the project.

Trevor recently led the relocation and reconnection of one of the hospital's ICT network communications room, which involved more than 600 key hospital connections. These connections support patient monitoring systems, medical imaging servers, hospital television services and more – all while still maintaining critical hospital services. Nice work, Trevor and the team!
